

# STORM

## OPERATING INSTRUCTIONS – SAFETY - MAINTENANCE – SPECIFICATIONS

**This manual has important safety warnings and operating information.  
Please read before using the unit and save for future reference.**

Odorchem's ONA STORM will neutralize odors in a room up to 10,000 sq ft. OdorChem's ONA 20L GEL Pail will last from 12 - 16 weeks, depending on temperature and humidity levels of the room, and the airflow setting of the STORM.

### OPERATING INSTRUCTIONS

1. Operate the STORM on a level surface only. This will prevent GEL from entering the fan. Remove lid on 5 gal (20 liters) pail of OdorChem Gel. Slide STORM unit over top of pail so that it is centered on the pail of gel.
2. Plug the STORM into grounded 110/220V outlet and switch to "High" for maximum air flow of 225 cfm or adjust to suit the required amount of odor control.
3. When the GEL is reduced to within one inch of the bottom of the pail, replace the GEL Pail. Stir GEL weekly to maintain proper evaporation rate.

### SAFETY INFORMATION

**The STORM is equipped with a three-terminal type grounding plug on the electrical cord. It must be plugged into a properly grounded three-prong outlet. The unit is designed to operate on ordinary household 110/120 volt, 60 Hertz alternating current.**

- Never put the STORM into standing water due to shock hazard.
- Always operate the STORM in a horizontal position to prevent spillage and immersion of motor.
- Connect the power supply to an appropriate power source. Be sure that all electrical cords and extensions are of adequate size and properly insulated.
- Never allow the rear of the unit to become plugged with paper or other loose materials.
- Never place the STORM on dust, sand, or loose paper. Materials may become drawn up into the air intake while operating causing extreme damage to the motor.
- Never attempt any servicing or cleaning on the STORM while it is plugged into electrical current. This may result in shock or injury.
- Never probe the fan with wire or other instruments while the unit is operating.

### MAINTENANCE

- The unit should be kept clean.
- Verify the level of GEL in the 20 L pail every other week.

## SPECIFICATIONS

Weight	9 kgs (20 lbs)
Ship weight	12 kgs (25 lbs)
Capacity of pail	20 Liters (5 gallons)
Output	225 Cubic feet per minute
Power consumption	Up to 42 watts
Power	110/220 Volts
Cycle	50/60 Hertz

## ODOR NEUTRALIZATION

**STORM** is to be used ONLY with OdorChem products. OdorChem products do not merely mask odors but bonds with the offending molecules rendering them odorless. The active ingredients are a blend of 44 essential oils and plant-derived compounds, native to Australia and Asia. OdorChem products neutralize a wide spectrum of odors. OdorChem products are safe and biodegradable, designed for use in any environment.

All OdorChem products are scientifically engineered to be completely non-toxic and environmentally safe. They have proven to effectively neutralize virtually any odor permanently.

Some of the applications in which STORM has been successful neutralizing odors include:

Animal kennels	Hotel rooms	Refrigerated transport
Animal transport	Kitchens	Restaurants
Auditoriums	Laundry rooms	Slaughterhouses
Automobile repair shops	Locker rooms	Storage areas
Butcher shops	Motel rooms	Warehouses
Chicken sheds and farms	Nursing homes	Waste disposal areas
Clubs	Paint shops	Waste sludge storage areas
Designated smoking areas	Pig farms	Waste storage areas
Dog kennels	Poultry farms	Waste transfer station
Drains	Public bathrooms	Yeast production plants
Fish markets	Pubs & Bars	
Food processing plants		
Funeral homes		
Greenhouses		
Gyms
