

ENGLISH

ONA CYCLONE FAN

OPERATING INSTRUCTIONS

ONA Cyclone can provide odor neutralization for rooms up to 5000 sq ft (464 sq. m.). Use with ONA 20L Gel containers only. Each ONA gel container will generally last from 3 - 6 weeks depending on room temperature, humidity, and fan speed.

OPERATING INSTRUCTIONS

1. Remove lid on 20-liter (5 gal) pail of ONA Gel.
2. Place Cyclone fan on top of a 20-liter gel pail.
3. Plug the power adapter (included) into the Cyclone and then into a power outlet.
4. Choose desired airflow speed for effective odor neutralization.
5. When ONA Gel is reduced to within one inch of the bottom of the pail, replace the Gel pail.

MAINTENANCE & USAGE

- Keep Cyclone unit clean, and fan vents clear of anything that may restrict airflow.
- If the strength of odors in a room fluctuates, adjust fan speed to compensate.
- For best results, use Cyclone in an elevated, unobstructed position such as on a table.

SAFETY INFORMATION

- ONA Cyclone is designed to operate on 100 - 240-volt, 50/60 hertz alternating current.
- Operate the ONA Cyclone and Gel on a level surface only.
- Do not immerse Cyclone into water or liquid - shock hazard.
